

## INTERNATIONAL ASSOCIATION FOR AMBULATORY SURGERY

Dear colleagues

We are honored to announce that the 15th international Congress on Ambulatory Surgery will be held in Oslo, Norway, 12 - 15 May 2024.

Ambulatory surgery has experienced tremendous growth during recent years. We continue to do more complex procedures and treat more complex patients, some of whom are vulnerable such as the elderly, children, children with special needs, mentally disabled and many more. Thanks to innovation in surgery, anesthesia, and nursing but above all thanks to interdisciplinary teamwork we can guarantee safe home discharge for everybody all over the world.

This event will address to a multidisciplinary public: surgeons, anesthesiologists, nurses, managers, in short anyone with a heart for ambulatory surgery/anesthesia.

Local and international speakers, mainly surgeons, anesthesiologists and nurses will be present, and several workshops will be organized.

We are planning an excellent program for next year; updates will be presented on our website (<http://theiaas.net> and [www.nordaf.no](http://www.nordaf.no)).

Could it be possible to advertise for our congress? CME accreditation is currently pending.

Please find attached our e-flyer for IAAS Oslo 2024

Sincerely,

Mads Henrik Strand Moxness  
President of the Norwegian Ambulatory Surgery organization (NORDAF)
