Dear Colleagues,

It is a great pleasure to invite you to join me to this special “International Symposium dedicated to Children” to be held in Geneva on September 23. This symposium is the culmination of a career dedicated to the anaesthesia care of children at the Geneva Children’s Hospital.

The scientific program comprises a clinical part, with topics covering the major psychological and physiological challenges in paediatric anaesthesia; while the second part highlights the translational research that benefited children in clinical practice.

More importantly, the speakers are not only internationally renowned experts from around the world, but also colleagues and friends that I have encountered during my professional career and that have influenced my medical and scientific career.

I am honored by their presence and I hope you will enjoy their presentations, which will also offer great educational opportunities for learning, motivation and inspiration for the future.

The venue, Campus Biotech, the life sciences hub for the region, illustrates the creativity and innovation in medicine and I would be delighted to share with you this special very special educational and scientific meeting.

Walid Habre

# Scientific Program

| | | |
|---|---|---|
| **8.45-9.00** | Welcome note | **Prof Martin Tramer**<br>**Prof Laszlo Vutskits** |
| **9.00-9.30** | The premature baby: from physiology to pharmacology | **Francis Veyckemans (Belgium)** |
